

Capabilities Statement

InnovoGraph LLC

Grant Millin is a management consultant and owner of InnovoGraph LLC. InnovoGraph offers strategic innovation services. InnovoGraph supports strategists with value-amplifying strategy, innovation and design capabilities.

Organizations of scale—even communities—grapple with a mix of complexity, effective strategy search, missing innovation supports, and talent potential losses. Wiping out greater wisdom and key activities due to poor engagement and absence of a solid, amplifying strategic innovation capability *is too easy*.

Consultants should be able to support results in two areas: strategy and innovation. **InnovoGraph makes strategic innovation work.**

InnovoGraph clients are left with the engagement solution and an interactive, true ‘living document’ with solution breakdown. The strategic, innovation and/or business plans—as well as component ideas with business cases—are available in this new *Connected Strategist* environment.

InnovoGraph supports these strategists—leaders, stakeholders, managers, and staff—as we develop value offers capturing greater options. The InnovoGraph approach enhances existing client methods by establishing a frontend ‘design thinking place’ for more powerful strategy and innovation outcomes.
